PROFESSIONAL SUMMARY

Skilled Software Development Engineer with over 2 years of experience in web development, specializing in Angular, ReactJS, and Ionic framework. Proficient in integrating front-end components with REST APIs and collaborating effectively with back-end teams. Experienced in optimizing applications for performance, scalability, and accessibility. Passionate about creating innovative, user-friendly web applications that meet high standards of functionality and design. Strong foundation in Agile methodologies.

SKILLS

- Web Development: ReactJS, Angular, HTML, CSS, Sass
- Programming Languages: TypeScript, JavaScript, Python, Java
- State Management: Redux, Redux Toolkit, React Hooks, RxJS
- Mobile Development: Ionic, Cordova, Capacitor
- Version Control: Git, GitHub, GitLab
- Tools: Postman, Visual Studio Code, Android Studio, Xcode, JIRA, Chrome DevTools
- Agile Methodologies: Sprint Planning, Daily Standups, Velocity Analysis, Retrospective

PROFESSIONAL EXPERIENCE

SURYA DIGITECH PRIVATE LIMITED

July 2022 - April 2024

Software Development Engineer I

- Designed and developed user interfaces using Angular, ReactJS, HTML, CSS, TypeScript, and JavaScript.
- Translated Figma designs into responsive user interfaces (UI) for applications.
- Integrated front-end components with REST APIs to fetch and display data.
- Collaborated with back-end developers to create a seamless user experience.
- Optimized applications for performance and scalability.
- Wrote clean, maintainable, and well-documented code.
- Tested and debugged applications to ensure quality.
- Managed front-end deployment and facilitated uploads to the Play Store and App Store Connect.

Projects:

Construction Site Work Monitor and Management Application

- **Objective:** Developed an application to monitor and manage construction site activities, ensuring efficient project tracking and resource management.
- Responsibilities: Led front-end development using ReactJS, Redux, TypeScript, HTML, and CSS.
- Key Contributions:
 - Created a responsive and user-friendly interface.
 - Integrated REST APIs for real-time data synchronization and reporting.
 - Implemented Redux for state management.

Back Office Application for Construction Management

- **Objective:** Created a back-office application to support administrative tasks and data management for the construction site monitoring application.
- **Responsibilities:** Developed the user interface with Angular.
- Key Contributions:
 - Ensured a cohesive and efficient user experience.
 - Integrated REST APIs for seamless data management and administrative functions.
 - Collaborated with back-end developers to ensure smooth data flow and consistency.

• Employee Time Tracking Application

- **Objective:** Built an application to track employee work hours, ensuring accurate payroll processing and productivity analysis.
- Responsibilities: Developed the mobile application using Ionic, Capacitor, Angular, TypeScript, and Git.
- Key Contributions:
 - Ensured cross-platform compatibility.
 - Implemented features for time logging, reporting, and management approvals.
 - Participated in Agile ceremonies to enhance team collaboration and productivity.

EDUCATION

New Horizon College of Engineering, Bengaluru

2018 - 2022

Bachelor of Engineering in Electronics and Communication Engineering, CGPA: 9.17.
