PROFESSIONAL SUMMARY

Senior Associate Software Development Engineer with 2+ years of experience building scalable, high-performance web applications using ReactJS, Angular, Node.js, NestJS, and MongoDB. Strong background in microservices, distributed systems, RESTful APIs, and Kafka-based data pipelines. Proven ability to deliver maintainable code with 95%+ unit test coverage, reduce QA effort by 50%, and improve release stability through automation and CI/CD. Skilled in Agile methodologies and cross-functional collaboration in fast-paced environments.

TECHNICAL SKILLS

Frontend: ReactJS, Angular, HTML5, CSS3, Sass, JavaScript (ES6+), TypeScript

Backend: Node.js, NestJS, Express.js, MongoDB, REST APIs

Mobile: Ionic, Capacitor, Cordova

State Management: Redux, Redux Toolkit, React Hooks, RxJS

Tools & Methodologies: Git, GitHub, GitLab, CI/CD, JIRA, Agile (Scrum)

WORK EXPERIENCE

NTT DATA, INC

03/2025 - Present

Senior Associate Software Development Engineer

- Built and scaled NestJS-based backend services with comprehensive unit and integration testing using Jest, reducing production defects by 35%.
- Designed and deployed a Kafka-based asynchronous consumer pipeline for data ingestion, automating data workflows and saving 10+ hours per week.
- Modernized legacy MongoDB Realm Function GraphQL services by migrating to Apollo Federation, improving schema governance and reducing post-release incidents by 25%.
- Partnered with DevOps teams to strengthen CI/CD pipelines, enabling zero-downtime deployments and improving overall release reliability.

SURYA DIGITECH PRIVATE LIMITED

07/2022 - 04/2024

Software Development Engineer I

- Designed, built, and maintained full-stack applications using MERN and MEAN stacks, supporting 1000+ daily active users.
- Optimized RESTful APIs, reducing average response times by 30% (3s → 2.1s) and improving overall application performance.
- Delivered responsive, scalable UIs from Figma designs, ensuring consistent user experience across devices and browsers.
- Implemented Redux and RxJS-based state management, reducing UI interaction latency by 25% and improving data flow reliability.

SURYA SOFTWARE SYSTEMS PRIVATE LIMITED

02/2022 - 06/2022

Software Development Engineer Internship

- Delivered cross-platform mobile apps using Ionic, accelerating feature delivery by 30% over native builds.
- Implemented and validated RESTful APIs supporting real-time workflows, reducing latency by 40%.
- Partnered with senior engineers to refine UI/UX interactions, improving usability metrics by 15% and reducing reported issues by 25%.

Project

Construction Site Work Monitor and Management Application

A web-based application designed to monitor on-site work progress, manage resources, and provide real-time operational insights for construction projects.

- Developed a responsive, user-friendly frontend using ReactJS, enabling efficient tracking and visualization of site activities.
- Implemented Redux-based global state management, improving application responsiveness and reducing UI update latency by 25%.
- Designed and optimized MongoDB schemas to support high-volume operational data, achieving 30% faster query performance.
- Integrated the frontend with Node.js and Express.js REST APIs, enabling real-time data synchronization and accurate reporting across modules.

EDUCATION

New Horizon College of Engineering, Bangalore

2018 - 2022

B.Tech - Electronics and Communication Engineering
